

EXPERIENCE COUNTS!

Dr. Andrew Wolin brings over 20 years of experience in using patient's own fat to sculpt and contour faces, breasts and bodies

LIPS AND LINES

So... you're looking in the magnifying mirror as you put on your eyeshadow, your mascara and your cheek foundation and now you get a good look at your lips. A gasp of disbelief permeates the atmosphere. "Where did those lines come from...I didn't see them there last week.. how will I ever hide the grooves and lines with my lip liner and lipstick?"

At the Wolin Plastic Surgery Center, Dr Andrew Wolin has found multiple solutions to the "lips and Lines" dilemma. For the past few years Dr Wolin has incorporated his 20 year experience with fat transfer with his 20 year experience with laser skin therapy to eradicate all those irregularities and grooves in the lips. By using MICROFAT transfer of a patient's own fat and combining the MICRO FAT transfer with laser therapy, he has been able to conquer the battle of the lip lines. The procedure is an office procedure done under local anesthesia, taking less than 45 minutes.

Not only is FAT being transferred, but STEM CELLS and growth factors are also transferred with the fat to improve the overall health of the lips as well as the appearance.

For those patients that want a faster, less permanent solution to the lip problems, Dr Wolin is using Micro Cannula injection of Juvederm to provide a painless and bruiseless solution to the lip line problem.

For those who are looking to rejuvenate an aging lip or simply add volume to a lifelong thin lip, there are also fat transfer options for long term permanent correction or Juvederm for a shorter term temporary fix. By utilizing blunt cannulas rather than needles, the procedures are almost painless, do not cause bruising and provide the patients with a great experience.

Call The Wolin Plastic Surgery Center for your new fuller, smoother and more kissable lips...
