

EXPERIENCE COUNTS!

Dr. Andrew Wolin brings over 20 years of experience in Plastic Surgery as well as ENT/Facial Plastic Surgery

*Pay attention to your eyes;
they are the portal to your soul!*

So you get up in the morning, amble to the mirror and stare in disbelief. "My eyes used to be my best feature...why are they sunken, hollow and sad?"

It's a fact that as you age, the support of your face and eyes slowly vaporizes, leaving you a mere shadow of your former self. Is there a simple way, without complicated surgery, that you can PERMANENTLY improve your eyes, your brows, your temples and your forehead. Dr Andrew Wolin, an Aesthetic Plastic surgeon double boarded in Plastic Surgery and ENT/Facial plastic surgery practicing in Scottsdale says: "ABSOLUTELY YES!"

By borrowing fat from areas of your lower body, he has developed a way of transferring that fat, in a simple office procedure, to the areas around the brow, temples, and lower lids to fill in the hollows caused by the natural aging process. The fat transfer is absolutely permanent as opposed to the temporary nature of other non biological fillers and

is the best rejuvenating option available today. Not only are fat cells transferred, but adult stem cells as well as rejuvenating growth factors are also transferred during the procedure.

After 18 years of experience with the fat transfer procedure and over thousands of happy patients, Dr Wolin feels that this approach is on the cutting edge of true regenerative medicine and has become the gold standard in improving not only the volume of the areas treated, but also the overall well being and aesthetic improvement of the overlying skin.

Call Wolin Plastic surgery center today and begin to enjoy the look of the person looking back at you in your mirror.
